

Growing Success From the Ground Up - part 2 Unlocking the secrets in the soil

Urban farming requires some of the same components as traditional farming — one of those components is healthy soil using soil amendments including cover crops.

Continue the journey to learn about soil fertility and soil health for successful crop production.

A free supply of livestock manure will be available to add to your compost pile (bring your own containers).

Date: **Saturday, September 26, 2015 9:00 a.m.—12:00 p.m.**

Location: **Stearns Homestead, 6975 Ridge Road, Parma**

just south of Parmatown Mall

Doors open & refreshments at 9:00 a.m.

Program begins promptly at 9:30 a.m.

Guest Speakers:

Al Norwood, District Conservationist, USDA-NRCS - High Tunnels

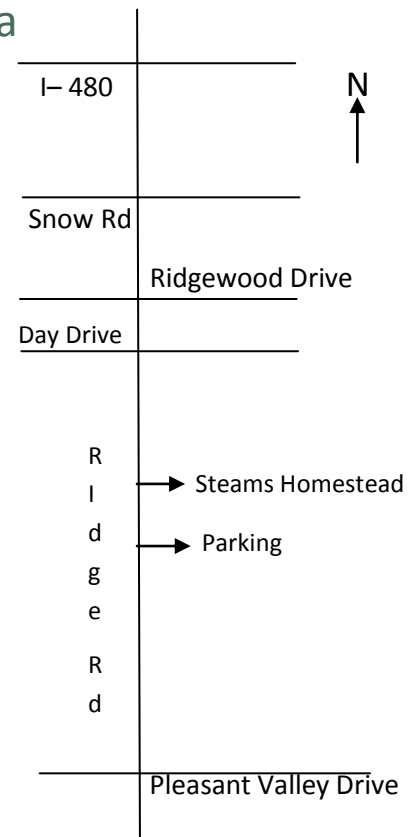

Steve Baker, State Soil Scientist, NRCS — Soil Health, Soil Tests and How to read a soil test analysis

Jim Hoorman, Extension Educator, OSU Extension - Cover Crops

Eric Schwab, Agronomist, USDA - NRCS - Resource Management Systems for vegetable production

RSVP by September 18, 2015
